

Create instance
(collect REST
data)

Flowchart for Generic Exporter Galaxy Tool

(CWL 09FEB2017)

Notes:

Perl (or python validation script passed
into constructor

The tmp dir is named after the
dataset name to assure uniqueness

Dashed processes for implemented
for specific EuPath datasets

Need to be inside tmp dir to
create proper tarball

Empty flag triggers iRODS to
unpack tarball

No polling for status flag currently

export
